## Carbon Reduction Projects

### Completed Carbon Reduction Initiatives

Since establishing our 2023 baseline, we have implemented several environmental management measures to support our carbon reduction goals. These initiatives will also be applied during the performance of this contract:

#### 1. Reducing Travel Emissions:

- Implementing technology solutions such as Zoom and Microsoft Teams to minimize the need for employee travel to fixed offices.
- Encouraging the use of low/zero-emission vehicles for business travel, including company cars.
- Promoting the use of public transport and ride-sharing options, particularly for longer journeys.

## 2. Eco-Friendly Partnerships:

- Collaborating with suppliers and logistics providers that share our environmental goals, prioritising those that use low/zero-emission vehicles.

## 3. Recycling and Paperless Operations:

- Recycling packaging materials and toner cartridges.
- Transitioning to electronic communications and invoicing to eliminate paper waste and reduce emissions from postal transportation.

## Future Measures

As a small enterprise, we recognise that our resources for implementing additional large-scale carbon reduction measures are limited. However, we remain committed to continuously seeking innovative solutions to further reduce our carbon footprint.

- We aim to build on our current initiatives, improving their effectiveness where feasible.
- We will stay informed about emerging technologies and commercially viable practices that align with our environmental goals.
